

DHM[®]

3D Printing

&

Mechanical Automation

PROFILES STRUCTURAL AND ACCESSORIES

WHO WE ARE:

We are an Italian company that since 2012 accompanies the transformation of Craftsmanship towards Industry 4.0.

We provide mechanical and electronic components that can be used on CNC machines, automation systems or prototypes. We also have a wide assortment of Filament and Resin 3D printers, as well as accessories and consumables.

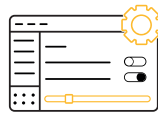

We offer a wide range of product customization through our configurators, and supply of non-catalog material.

The items handled are sample tested in our headquarters in Venice by qualified personnel to ensure our customers reliable and high quality products. They are available and delivered immediately, or can be ordered with the timing specified in the product sheet.

Thanks to the experience gained and the use of 3D printing we work directly in the field of industrial automation and robotics. We study, design and manufacture machines to make process lines safer, faster and more reliable. We provide adequate support in case of need.

In view of sustainable development we participate in Race to Zero, for the achievement of carbon neutrality.

CONFIGURATOR

Configurable components are products where you can select specific design features, and see pricing and lead times at a glance.

Popular configurators include linear shafts, linear guides, miniature linear guides, aluminum extrusions and aluminum sheets. Select your specifications from material, surface treatment, length and diameter.

Various types of machining are available on request: drilling, threading, tapping, grooving, honing, satin finishing, coloring and packaging.

PROJECTS MANAGEMENT

This tool allows you to create different projects or lists of items on our website to order them at your convenience. Add products by clicking the "Add to Project" button or through the dedicated page within your personal profile.

You can also share projects in various ways: you can send a read-only copy, you can export your project to PDF or CSV, and you can make your project public on the project page of our website.

TECHNICAL RESOURCES - BLOG

A single point where you can find insights, application tips, videos, technical articles and tutorials, but not only, to support you during the development of your projects.

In addition, for registered users, you can download the pdf of the technical sheets for each product on the platform.

ADVANCED PRICES/AVAILABILITY MANAGEMENT

With the renewal of the online platform and the continuous updates, we have made it even easier to check stock availability and price, and purchase products. In each product page, as in the cart before concluding the order, you can check stocks in real time, with the timing of delivery of the material and specific details about the processing, if any. You can also see the stocks that can be purchased in back-order with the timing of arrivals and management by the factory.

SHARE/SAVE CART

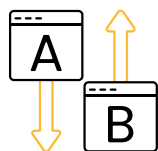

Our DHM-online platform now offers you the ability to save and share your shopping cart. This way you can save products for a future order, or forward your cart to a colleague to place an order. You can also save multiple carts. For full details, access your cart and click the "Share" or "Save" icon.

ADVANCED SEARCH

Thanks to the advanced search, browsing through the categories and products of the DHM-online website is much easier. The advanced search allows you to search through filters, narrowing down the number of compatible components to your needs until you find what you're looking for.

PRODUCT COMPARISON

The product comparison tool allows you to select up to 3 products at a time to compare. On the dedicated page you can compare the information and specifications of the selected products in a side-by-side format, making it easy to identify similarities and differences between products. You can remove or add items to your cart easily by clicking on the appropriate button.

QUOTE

In each product sheet you can find the button "add to quote", in this way you can create a request by including the product in the desired quantity. You can then complete the quote request for the single product or proceed with the inclusion of other items in the list.

When you're on the "Submit Quote Request" form, fill out all the necessary fields so that we can generate the most accurate quote possible. You can also change the quantity directly when submitting on your quote if needed.

This service is dedicated to B2B customers

QUICK ORDER

From the quick order page you can quickly order all the products you need at once.

Just enter the product code of the store (reference - SKU), the title, the variant and the quantity required. Click on "add to cart" and you're ready to complete your purchase.

Alternatively, you can upload the product list (BOM): upload an Excel, CSV or tab-delimited file with the title or product code and quantity required.

FAQ

If you need support, assistance or more information about a product, an order or an online service, we are here to help. In the Frequently Asked Questions (FAQ) section you will easily find quick answers to the most common questions regarding orders, account, catalog and more. In addition, on each product page you can submit a specific request for technical support.

Dedicated assistance

For customers with a business account and for public administrations it is possible to use the online technical support chat. Dedicated support allows you to have a direct connection to our team. If the chat is offline please refer to our customer service at 049 2701149 or email info@dhm-online.com

Affiliate Program

Through our affiliate program you can monetize your traffic on blogs, forums, content platforms or social pages. You create easy-to-use links through which you can redirect your audience to specific recommended products earning money with every purchase or for every eligible sign-up. In turn, the new customer will receive a coupon good for their first purchase. Only new customers can be sponsored, it is not possible to sponsor a customer already registered on the site.

Loyalty Program

Our loyalty program allows customers to accumulate points based on orders placed. This will allow you to take advantage of dedicated discounts that can be viewed directly on the product page during purchase or in the account section.

For more information about our services visit the dedicated page on our website
<https://www.dhm-online.com/en/content/20-dhm-online-services>
or contact us through email, phone or contact form in our website.

Profiles structural and accessories

Structural profiles and accessories

Compass DHM projects supplies mechanical components for industrial automation and 3D printing, including structural profiles (modular aluminum profiles).

The wide range of components, the online cutting configurator with immediate quotation, and the shipping within 24 hours allow a fast and reliable supply.

The raw aluminum structural profile is ideal for all those applications ranging from construction for industrial carpentry to that of hobby; they are suitable for the mechanical construction of modular structures. Find ready-to-ship aluminum profiles:

- series 5 - slot 6 mm - module 20
- series 6 - slot 8 mm - module 30
- series 8 - slot 10 mm - module 40

All the series of profiles have slots to ensure a stable fixing even with high static and dynamic loads, and foreseen for the use of all the accessories necessary for the construction. Profiles can be available in various formats:

- slot on 1 side
- slots on 2 opposite sides
- slots on 2 consecutive sides
- slots on 3 sides
- slots on 4 sides

The aluminum profiles allow for a modular system. Anodized aluminum profiles require neither mechanical processing nor welding for their joining. The grooves on the profiles are made with an extrusion process obtaining highly respectable precision and tolerances: nuts, plugs, various anchors can be inserted.

Here are the main advantages of aluminum profiles:

- Modularity: modular and modular aluminum alloy profiles that offer the possibility of infinite combinations
- Customization: our online cut-to-size service is available 24/7 for an immediate quote and a quick purchase
- Innovation: through CAD management, the systems created using profiles make it possible to create innovative solutions for the industry.

Series 5 (slot 6)

5 series profiles (6 mm slot)

Compass DHM projects supplies mechanical components for industrial automation and 3D printing. Among these we find the 5 series aluminum profiles. The aluminum profiles with 6 mm groove and module 20 can be easily assembled thanks to the various accessories. They are particularly suitable for applications with limited loads and as a reinforcement behind flat elements.

20 mm base aluminum profiles:

- Profiles with 6 mm groove for lightweight structures such as stands and laboratory installations
- The 20x40 and 20x60 profiles are particularly suitable for shoring
- Ideal for building display cases, shelves and housings

Modular aluminum profiles series 5: we have ready-to-ship profiles in bars that can be cut to size. Discover our cutting configurator to pack the profile kit you need.

In addition to the anodized profiles with various types and number of slots, you will find the relative accessories such as aluminum brackets, two or three-way aluminum joints, plastic finishing caps and much more.

SERIES 5 - Slot 6mm - CUT TO MEASURE Structural profiles - anodized extr...

Brand: DHM Pro
SKU: config-serie5

Structural extruded aluminum profiles cut to size - length expressed in millimeters (mm) ATTENTION TOLERANCE ON CUTTING OF +/- 0.5mm Processing time 24/48h on material in stock What does series 5 mean? The profiles have 6 mm wide slots. These light and economical profiles, for the price/quality ratio, have an important peculiarity: they have a transparent anodized surface treatment. Therefore, they can be installed even in unfavorable environments. By choosing the right combination of slots, they can be used for various types of installation. For example, they are ideal for the realization of protections and customizable structures. Among the other products of the series 5 you can find pre-assembly or post-assembly T-nuts, screws and accessories compatible with all configurations that you can get by customizing your profile series 5! One of our services is the customization of the product, in particular the cutting to size. We offer cutting to size using cut-off machines and cutting benches, with the possibility of selecting the material that best suits your needs by customizing thicknesses, diameters and lengths. On request you can take advantage of various types of processing: drilling, threading, tapping, end cutting, creation of grooves, sanding, satin finishing, coloring and packaging. You can use the contact form on the right or contact us by e-mail.

Available in the following versions:

Anodized aluminum hinge with nylon seals series 5

The package contains: 1 x Anodized aluminum hinge with nylon seals series 5 This anodized aluminum hinge has nylon seals that prevent rubbing between the metal parts of the hinge itself in the movements of opening and closing. This hinge is used with aluminum profiles series 5.

Marca: DHM
SKU: 14090107

Pre-assembly long nut - Series 5 steel - M5 thread

Package contains: 1 xLong pre-assembly nut with holesM5 -5 Series This nut is suitable for use with extruded aluminum profiles. It can be used with 5-series profiles such as 20x20mm and 20x40mm, which have 6mm slots. They are to be inserted before mounting the profile. Threaded tapped hole that allows you to fix the nut with the respective screw. They are suitable for fixing a linear guide to the profile.

Marca: DHM

Marca: DHM - SKU: 14080102

Package contains: 5 x Caps 20*40 mm for profile series 5 Caps for aluminum profiles series 5 hollow 6 mm. They are standard caps to protect the ends of the profiles. The material is polyamide, the color is black. The profile and the number of feet of the caps may vary depending on the batch available.

K800 trolley wheels nylon Ø19 mm 3D printing Kossel

Marca: DHM - SKU: 05060101

Package contains: 1 x Kossel K800 wheel Teflon wheel mounted on radial ball bearings ideal for the construction of carts to slide on linear guides for printers such as Kossel or small CNC. Suitable for aluminum profiles 15x15.

Trolley wheels Delrin Small wheel MR105

Marca: DHM - SKU: 05060201

Package contains: 1 x Delrin Small wheel MR105 Delrin wheel ideal for use with aluminum profiles in the movement of 3D printers, but also other projects. Allows you to work with high precision and tolerance. Suitable for 20x20 profiles. Internal hole 5 mm. Bearing MR105.

Angle 20 * 20 with cap - for profile series 5 2020

The package contains: 1 x Angle 20 * 20 with cap - for profile series 5 2020 Angle with centering lugs: fast, exact and non-rotating assembly - when mounting transversely to the groove or on plates, the centering lugs can be broken off The item that you can get for certain features differ from the one shown in the photo, depending on the production lot. However, the functionality is retained. The description of this item has been provided by automatic translation. If you have any questions, please do not hesitate to contact us.

Marca: DHM
SKU: 14030110

Corner Blind Brackets three-way type

The package contains: 1 x Corner Blind Brackets three-way type Example of use of the retractable corner bracket: 3 profiles can be joined at an angle. They are an internal connection that also acts as a cap for the profile. The item that you can get for certain features differ from the one shown in the photo, depending on the production lot. However, the functionality is retained. The description of this item has been provided by automatic translation. If you have any questions, please do not hesitate to contact us.

Marca: DHM
SKU: 14030109

Angle bracket 45° - serie 5

The package contains: 1 x Angle bracket 45° Aluminum profiles can be connected to each other via a bracket. This connection involves the insertion of nuts in the profiles and fixing with the screws. The bracket in question is an extruded aluminum anodized model for connecting the profiles on the corners. The item that you can get for certain features differ from the one shown in the photo, depending on the production lot. However, the functionality is retained. The description of this item has been provided by automatic translation. If you have any questions, please do not hesitate to contact us.

Marca: DHM
SKU: 14030106

Interior angle aluminum profile 2020

The package contains: 1 x Interior angle aluminum profile 2020 Internal angle for the right-angled connection of profiles. Suitable for our profile 20x20 series 5. Interior angles allow an elegant construction, especially with the design profile. Easy installation and attractive design. This interior angle is more solid than other offered angles made of sheet metal! Application: Installation of transverse bars on your construction that are not exposed to high pressure loads. Ideal for a montage where you do not want to see any angles. The item that you can get for certain features differ from the one shown in the photo, depending on the production lot. However, the functionality is retained. The description of this item has been provided by automatic translation. If you have any questions, please do not hesitate to contact us.

Series 6 (slot 8)

Profiles series 6 (8 mm slot)

Compass DHM projects supplies mechanical components for industrial automation and 3D printing. Among these we find the 6 series aluminum profiles. The aluminum profiles with 6 mm groove and module 30 can be easily assembled thanks to the various accessories. They are particularly suitable for medium loads, such as equipment trolleys, light fittings, frames and partitions.

30 mm base aluminum profiles:

- Profiles with 8 mm groove: optimal conformation from the point of view of weight and resistance
- The 30x30 and 30x60 profiles are characterized by convenience and stability, allowing the creation of various types of structures.

Modular aluminum profiles series 6: we have ready-to-ship profiles in bars that can be cut to size. Discover our cutting configurator to pack the profile kit you need.

In addition to the anodized profiles with various types and number of grooves (30x30 with 1 groove, 30x30 with 2 grooves, 30x30 with 3 grooves, 30x30 with 4 grooves, 30x60 rounded, 30x90 ...), you will find the relative accessories such as aluminum brackets, joints two or three-way aluminum, plastic finishing caps and much more.

Series 8 (slot 10)

Profiles series 8 (10 mm slot)

Compass DHM projects supplies mechanical components for industrial automation and 3D printing. Among these we find the 6 series aluminum profiles. The aluminum profiles with 10 mm groove and 40 module can be easily assembled thanks to the various accessories. They are particularly suitable for applications with high loads. The 10 mm groove is particularly stable, for example for workbenches, bodywork, machine frames, transport trolleys, protective cabins and heavy handling systems.

40 mm base aluminum profiles:

- Profiles with 10 mm groove: thanks to the particularly robust design, this groove allows high-strength connections.
- The 40x40 and 40x80 profiles are characterized by convenience and stability, allowing the creation of various types of structures.

Modular aluminum profiles series 8: we have ready-to-ship profiles in bars that can be cut to size. Discover our cutting configurator to pack the profile kit you need.

In addition to the anodized profiles with various types and number of grooves (40x40 with 1 groove, 40x40 with 2 grooves, 40x40 with 3 grooves, 40x40 with 4 grooves, 40x80, 120x40), you will find the relative accessories such as aluminum brackets, aluminum joints two or three way, plastic finishing caps and much more.

SERIES 8 - Slot 10mm - CUT TO MEASURE Structural profiles - anodized ext...

Brand: DHM Pro
SKU: config-serie8

Structural extruded aluminum profiles cut to size - length expressed in millimeters (mm) ATTENTION TOLERANCE ON THE CUT OF $\pm 0.5\text{mm}$ Working time 24/48h What does series 8 mean? The profiles have slots 10 mm wide. These profiles are the strongest and most versatile solution to obtain an excellent weight/performance ratio. They have an important peculiarity: they have a transparent anodized surface treatment. For this reason they can be installed even in unfavorable environments. By choosing the right combination of slots, they can be used for various types of installation. For example, they are ideal for the construction of supporting structures on machines and robotic systems. Among the other products of the 8 series you can find pre-assembled or post-assembled T-nuts, screws and accessories compatible with all configurations that you can obtain by customizing your 8 series profile! One of our services is the customization of the product, in particular the cut to size. We offer cutting to size using cutting-off machines and cutting benches, with the possibility of selecting the most suitable material for your needs by customizing thicknesses, diameters and lengths. On request you can take advantage of various types of processing: drilling, threading, tapping, end cutting, creation of grooves, sanding, satin finishing, coloring and packaging. You can use the contact form on the right or contact us by e-mail.
